EXPERIENCE

Venn Recruitment | [Website](#)

Remote

Co-Founder & Web Developer (Part-time)

2026 - Present

- Built and launched the agency's responsive website with a design-focused collaborator, translating brand and UX direction into candidate and employer journeys and dedicated submission forms.
- Collaborate with an international founding team on service definition, launch planning, and operational setup for employer and candidate outreach.

Pursue Studio

Remote

Web Developer

Aug 2025 - Apr 2026

- Developed responsive, production-ready landing pages for studio projects, translating high-fidelity branding and UI concepts into accurate coded interfaces.
- Collaborated with the design team to implement layouts, animations, and interactions across desktop and mobile; selected work: Mimic - [Live Site](#) | [GitHub](#).

Sotupub

Sousse, Tunisia

Software Engineering Intern

2025 | 6 months

- Designed and implemented Conv-Ai, an intelligent customer engagement platform using Next.js and Scrum, featuring an embeddable AI chatbot grounded in business-specific files and URLs.
- Leveraged retrieval-augmented generation (RAG) to automate lead qualification through customizable questions, capture user emails, and route prospects to appointment booking or live support agents.
- Engineered an administrative dashboard for domain management, chatbot customization, live interaction tracking, and basic email marketing functionality.

EDUCATION

ISSAT Sousse

Research Master's in Intelligent Pervasive Systems

Sousse, Tunisia

Expected July 2027

ISSAT Sousse

Bachelor's Degree in Computer Science (Software Engineering & Information Systems)

Sousse, Tunisia
